

# Classical School 2025-26

## Grades 3-5

Under the direction of a great team of teachers using a Montessori-style approach to learning, students will explore new ideas, experience hands-on learning, and learn to work with others. Students should bring a sack lunch along with the necessary utensils, but no food to heat.

### Tuesday Classes

**Think! Math Enrichment** covers reinforcement of basic skills at the child's specific level of ability, as well as math games, mind math, and overall math stimulation. One of our chief purposes is to instill a love for math and for students to understand its usefulness. Students will use accelerated learning techniques. Parents are welcome to observe the class to learn about it.

**Teacher:** Cheryl Red, Melissa Juren, and Sarah Silva

**Engineering and Technology (STEM)** – STEM-based education teaches children more than science and mathematics concepts. With technology and engineering education, students get to solve problems, design, and innovate while being presented with rich and varied experiences. It aims for broad technological literacy within areas such as robotics, electronics, bio technologies, and much more. Students are encouraged to show initiative, be innovative and creative, learn independently, and take responsibility. They learn teamwork and communication skills.

**Teacher:** Cheryl Red

**Computer Science** ~ Computers have long been part of everyday life, and our students need an early introduction and solid foundation to make the most of them. In Computer Science, students will be introduced to many areas of technology including typing, digital citizenship, coding, MS Office programs, basic computer skills, robotics, and video game design. Students will be challenged to learn and develop their creativity, abstract thinking, and problem-solving skills while also learning about hardware, software, computer history, and modern technology. No textbook is required, but each student must bring a USB Drive to class. **Teacher:** Melissa Juren

**World Geography** – Using a three-year rotation, students will travel across the globe visiting the countries of the world. Starting in year 1, students will visit the Americas. In year 2, students will tour Europe and year 3, Asia, Africa, and Oceania. From developing mapping skills, completing art projects, learning about languages and cultures, and sampling foods of the world, students will enjoy geography and love getting their passports stamped in each country they visit! **Teacher:** Sarah Silva

## Thursday Classes

**Art** – Just like a student can learn to write, students can learn to draw! The Classical School Student will receive art training in design, perspective, and technique. They will experiment with various art forms including color theory, drawing, painting, and other media. The purpose is to introduce students to art and to stimulate an interest in art. **Teacher:** Debby Jasinski

**Language Arts** – Known for its strong writing and rhetorical program, HEP introduces writing and grammar skills to our youngest writers via the Classical School Language Arts classes. The study of classical literature, coupled with lots of writing, will help each student to master grade level grammar concepts while working on basic paragraph writing skills. Taught by an experienced language arts teacher who is also a reading specialist, students will garner not only new skills but confidence in their abilities. **Teacher:** Sarah Silva

**History** – Using the classical history program, *Story of the World*, students will enjoy their journey through history one period at a time. This year they will focus on the Ancient Time period, and to help them experience this time we will introduce a variety of activities. Maps, projects, hands-on activities, and games will reinforce the instructive material as they journey through the book. **Teacher:** Hallie Hernandez

**Anatomy** - All creation is awe-inspiring, but the work of the human body is especially jaw-dropping! This study of anatomy and physiology showcases the intricacy and design of the human body, from DNA and cell creation to the skeletal, muscular, digestive, respiratory, cardiovascular, nervous/ endocrine, immune, and integumentary systems. Integrated with health and nutrition information students will do labs/activities to reinforce the topics covered in the textbook. The textbook and Notebooking Journal is also required **Teacher:** Sue Rothberg

**At Home:** For grades 3-5, parents must cover the areas of Phonics/Reading, handwriting, spelling, grammar, and math at home.

## Classical School Grades 3-5 Calendar

**Dates:** Tuesdays – 8/26-12/2/25 and 1/13-4/21/26  
Thursdays – 8/28-12/4/25 and 1/15-4/23/26  
Tuesdays & Thursdays – 8/26/12/4 and /-1/13-4/23/26

**Time:** 9:15-3:15 pm

**Cost:** Tuesday or Thursday: \$1700; after 7/4 \$1800

Two Days: \$3100 (2-day discount included); after 7/4 \$3200\*

New Student Application Fee - \$35

Registration Fee - \$125

\*The tuition fee includes the costs of teacher salaries, teacher aide salaries, building usage, materials, enrichment activities, security, special events, and other associated costs of providing a quality educational program.

### **Tips for Success in Grades 3-5...**

- ✓ Parents should set aside at least 2-3 hours per day for grades 3-5 schoolwork. Children in grades 3-5 need supervision and teacher direction at home. Math should be done daily since practice is essential for achieving math mastery. Mastery of elementary arithmetic makes life simpler in middle and high school.
- ✓ Schoolwork entails reading, writing, completing homework, and studying for quizzes and tests. Accelerated Math requires practicing the FACTS and working on speed.
- ✓ Special projects and other major activities often require the parent to set aside a couple of extra hours to ensure that these assignments are completed in a timely manner.
- ✓ All HEP TX students must complete a math curriculum and a reading curriculum at home since the limited amount of time we have your children at the Classical School is not enough to prepare your child academically in reading and math. If you need ideas for helping your child, please talk with the staff or make an appointment with Joanne Juren, Principal.
